Integrated Flowmeter
Thorpe Tube Style
Ohio Medical has a flowmeter that won’t be moved or lost. The Patented Tube Style Integrated Flowmeter combines a tube style flowmeter and a medical gas outlet into one simple, compact design – helping to reduce replacement/repair costs. The gas outlet offers an extra connection – giving you the flexibility to attach another flowmeter, hose or ventilator. Now you can do more, in less space. Rest assured you will always have a flowmeter when you and your patients need one most.

**Respiratory Therapists & Nurses:**
Reduce Worry & Frustration
Stop searching for a flowmeter. With the Integrated Flowmeter, once it’s installed, it will always be there when you need it.

**Biomedical Engineers & Department Managers:**
Avoid Unnecessary Replacement/Repair Costs
The Tube Style Integrated Flowmeter can help you save time and money because it reduces the number of lost or damaged flowmeters you reorder and/or repair each year.

**Equipment Planners & Design Engineers:**
Save Space
The Tube Style Integrated Flowmeter can be customized to your health care institution’s needs and saves space with its overall compact design.

**Facilities & Maintenance:**
Reduce Maintenance Costs
Stop moving the flowmeter from outlet to outlet, room to room, wearing out the outlets and causing them to leak. Because the Tube Style Integrated Flowmeter is permanently affixed to the wall, it stays put and lowers maintenance costs.

**AUXILIARY PORT OPTIONS**

The Patented Integrated Flowmeter comes equipped in DISS, Chemetron and Diamond/Ohmeda connections giving you the flexibility to deliver more solutions.

ohiomedical.com
Use the extra connection to add another flowmeter or connect a hose to another device.
INTEGRATED FLOWMETER CONFIGURATOR
FOR RETROFIT APPLICATIONS

Available in different flowrates, gas types and styles of connectors – the Integrated Flowmeter is retrofit capable and fits many different outlet types. Refer to the Integrated Flowmeter Ordering Guide (FI-OGUIDE) for additional information.
