* Collection bottles are manufactured from polysulphone material for unusual toughness during everyday use. Bottles are shatter resistant and prevent implosion during vacuum service. Polysulphone polymers are known for resistance and stability under high temperatures, perfect for repeated autoclaving/steam sterilization.
Overflow Safety Traps
Ohio Medical Overflow Safety Traps are recommended for use with all Ohio Medical Vacuum Regulators. Traps guard against accidental overflow and protect regulators, wall outlets and central pipeline systems from contamination and blockage.

- Meets NFPA and ASTM standards
- Clear, shatter-resistant bottle
- Unique float design ensures maximum vacuum flow and positive shutoff
- Easily autoclavable or gas sterilizable
- Latex-free
- MR Conditional

Disposable Hydrophilic Suction Filter
Disposable Suction Filters aid in infection control, minimize maintenance and prolong the life of vacuum regulators and wall vacuum systems.

- High flow bacterial filter
- Protects patients and personnel handling suction equipment
- Efficiency: 99.8% with particle challenge range of 0.3-10 microns @ 28.3 L/mi
- Prevents lint and aerosols from entering the regulator and wall outlet, keeping flow rates high
- Not a hydrophobic shut-off filter
